

Contracts Specialist

Aquila Engineering is seeking the services of experienced Contracts Specialist for the development, drafting, evaluation, negotiation, and contract management of complex contracts.

You will require excellent analytical skills, and your exceptional communication skills will allow you to provide high level advice and guidance to senior executive management.

Demonstrated knowledge of and application in performance base contracts; particularly in the Government sector, would be advantageous.

Demonstrated experience in the following applications is essential:

- Development and implementation of procurement plans and strategies;
- Prepare proposals, requests for quotation and invitation to tender document packages;
- Risk assessments and evaluations of tender responses;
- Contract negotiations; and
- Contract management.

Short to medium term opportunities exist; with either casual employment or sub-contract arrangements being offered. Applicants would need to be flexible with work location, as opportunities are often offered across Australia.
